

Handover Package

The handover package includes system overview, repository links, deployment notes, admin guide, support process, credentials location, and known limitations. This page is part of the Code 5 Developers knowledge library and supports software development, systems development, maintenance, and technology operations.

Training Sessions

Training should demonstrate key workflows, role permissions, common errors, reporting, support requests, and operational responsibilities. This page is part of the Code 5 Developers knowledge library and supports software development, systems development, maintenance, and technology operations.

Admin Guide

Admin guides explain user management, configuration, content updates, data export, backups, and escalation paths. This page is part of the Code 5 Developers knowledge library and supports software development, systems development, maintenance, and technology operations.

Support Transition

Support transition identifies who receives incidents, expected response times, maintenance scope, and how change requests are handled. This page is part of the Code 5 Developers knowledge library and supports software development, systems development, maintenance, and technology operations.

Client Acceptance

Client acceptance confirms that required documents, training, production access, and support arrangements are complete. This page is part of the Code 5 Developers knowledge library and supports software development, systems development, maintenance, and technology operations.

Operational note: use the documented process, keep client decisions visible, protect client data, and escalate delivery, security, or production risks before they become client-impacting issues.

Operational note: use the documented process, keep client decisions visible, protect client data, and escalate delivery, security, or production risks before they become client-impacting issues.

Operational note: use the documented process, keep client decisions visible, protect client data, and escalate delivery, security, or production risks before they become client-impacting issues.

Operational note: use the documented process, keep client decisions visible, protect client data, and escalate delivery, security, or production risks before they become client-impacting issues.

Operational note: use the documented process, keep client decisions visible, protect client

Training Sessions

Training should demonstrate key workflows, role permissions, common errors, reporting, support requests, and operational responsibilities. This page is part of the Code 5 Developers knowledge library and supports software development, systems development, maintenance, and technology operations.
